

AZ-104

Administer Identity

AZ-104 Course Outline

01: Administer Identity

02: Administer Governance and Compliance

Roles Policies

03: Administer Azure Resources

Tools

04: Administer Virtual Networking

05: Administer Intersite Connectivity

06: Administer Network Traffic Management

07: Administer Azure Storage

08: Administer Azure Virtual Machines

09: Administer PaaS Compute Options

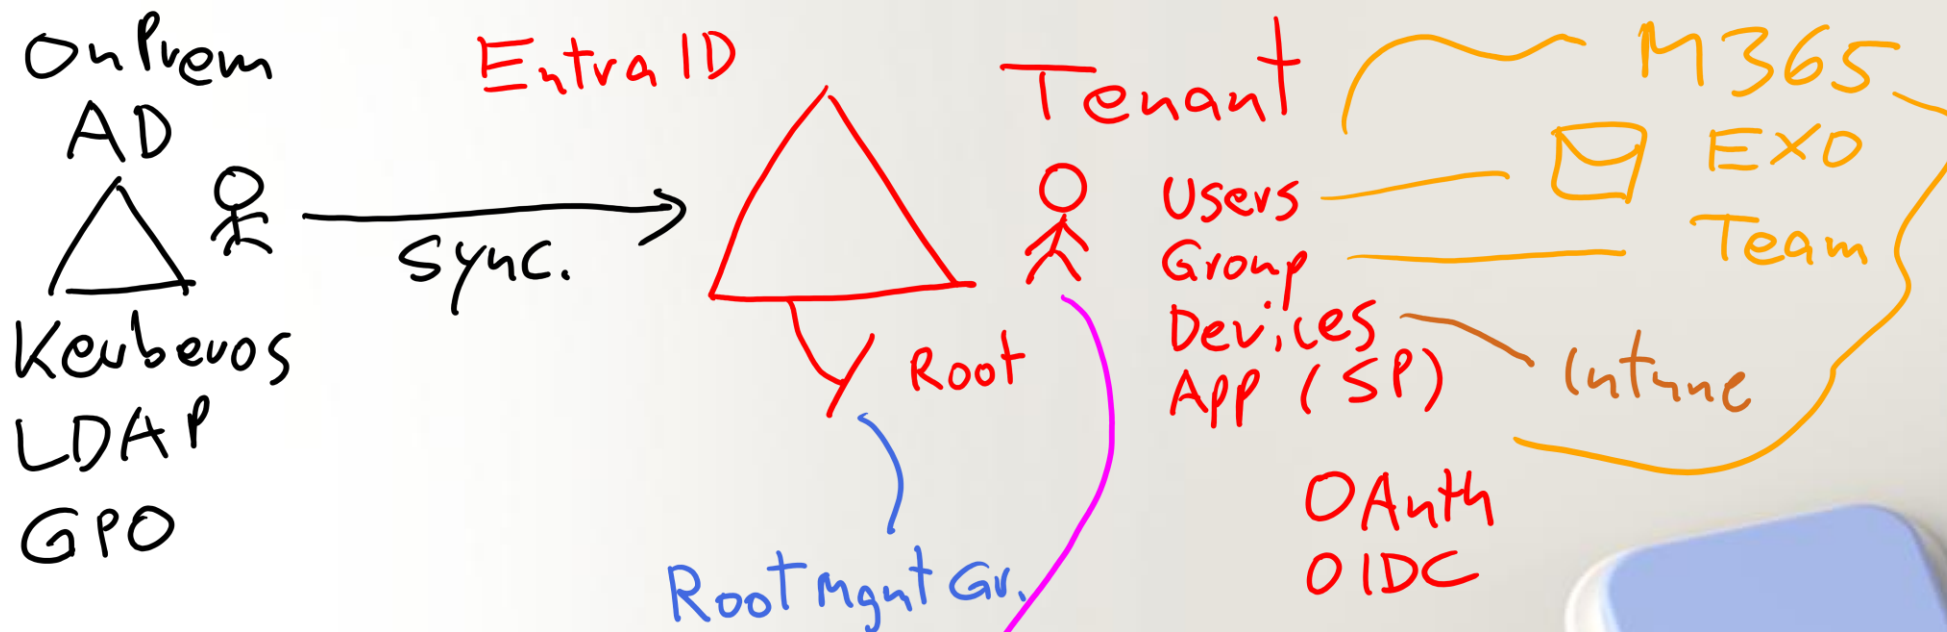

10: Administer Data Protection

11: Administer Monitoring

Learning Objectives

- Understand Microsoft Entra ID
- Configure User and Group Accounts
- Lab 01 - Manage Microsoft Entra ID Identities

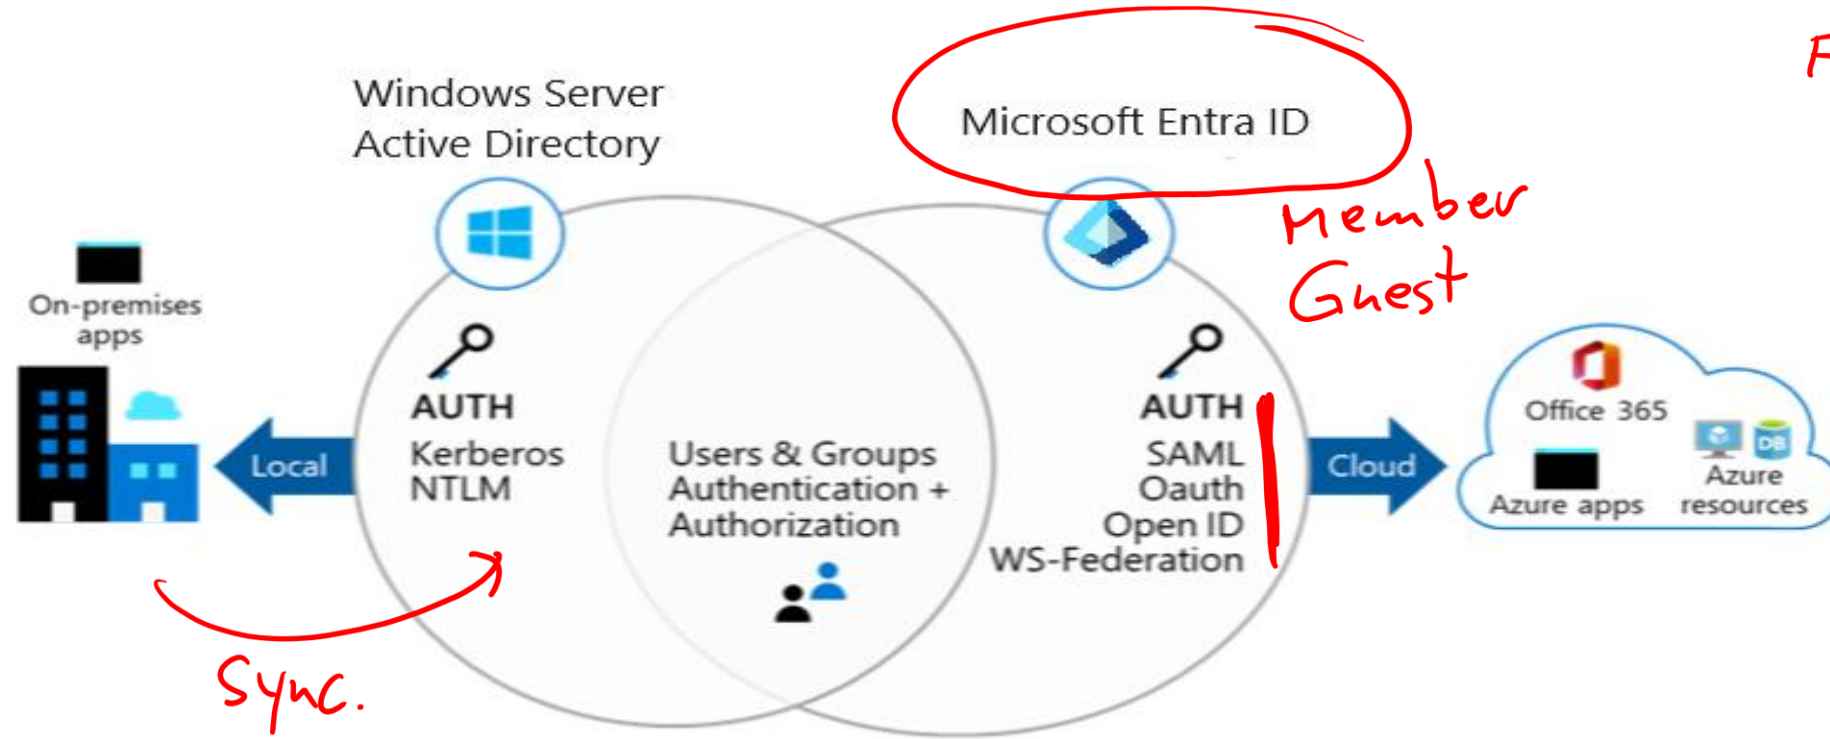

Understand Microsoft Entra ID

Examine Microsoft Entra ID

AWS IAM
GCP
FB

- Configure access to applications, including single sign-on
- Manage and provision users and groups
- Providing an identity management solution, including federation
- Implement security features like multi-factor authentication and conditional access

Describe Microsoft Entra ID Concepts

Concept	Description
Identity✓	An object that can be authenticated
Account✓	An identity that has data associated with it
Microsoft Entra ID account	An identity created through Microsoft Entra ID or another Microsoft cloud service
Tenant/directory	<p>A dedicated and trusted instance. A tenant is automatically created when your organization signs up for a Microsoft cloud service subscription.</p> <ul style="list-style-type: none">• Additional instances can be created• Microsoft Entra ID is the underlying product providing the identity service• The term <i>Tenant</i> means a single instance representing a single organization• The terms <i>Tenant</i> and <i>Directory</i> are often used interchangeably
Azure subscription\$	Used to pay for Azure cloud services

Compare Microsoft Entra ID to Active Directory Domain Services

AD-DS

Microsoft Entra ID is primarily an identity solution

Queried using the REST API over HTTP and HTTPS

Uses HTTP and HTTPS protocols such as SAML, WS-Federation, and OpenID Connect for authentication (and OAuth for authorization)

Includes federation services, and many third-party services (such as Facebook)

Microsoft Entra ID users and groups are created in a flat structure, and there are no Organizational Units (OUs) or Group Policy Objects (GPOs)

AU

SC

Compare Microsoft Entra ID P1 and P2 plans

Feature	Free	P1	P2	Governance
Single Sign-On (unlimited)	✓	✓	✓	
Cloud and Federated authentication	✓	✓	✓	
Advanced group management		✓	✓	
Self-service account management portal	✓	✓	✓	
Multifactor authentication (MFA)	✓	✓	✓	
Conditional access		✓	✓	
Risk-based Conditional Access (sign-in risk, user risk)			✓	
Automated user and group provisioning to apps		✓	✓	✓
Privileged identity management (PIM)			✓	✓

✓
✓ Access Pack

What is self-service password reset in Microsoft Entra ID?

1. Determine who can use self-service password reset
2. Choose the number of authentication methods required and the methods available (email, phone, questions)
3. You can require users to register for SSPR (same process as MFA)

Password reset - Authentication methods
mitanic (Default Directory)

« Save X Discard

✖ Diagnose and solve problems

Manage

- 1 Properties
- 2 **Authentication methods**
- 3 Registration
- Notifications
- Customization
- On-premises integration

Activity

- Audit logs
- Usage & insights

Troubleshooting + Support

- New support request

Learning Recap – Understand Microsoft Entra ID

**Check your
knowledge
questions and
additional
study**

- Understand Microsoft Entra ID
- Allow users to reset their password with self-service password reset
- Implement and manage hybrid identity

Configure User and Group Accounts

Create User Accounts

Users | All users
Microsoft

[+ New user](#) [+ New guest user](#) [Bulk operations](#) [Refresh](#) [Reset password](#) [Multi-Factor Authentication](#) [Delete user](#)

All users

Deleted users

Password reset

User settings

Diagnose and solve problems

Name	User principal name	↑↓	User type	Directory synced
Retail Crisis Notifications	[redacted]@microsoft.com		Member	Yes
Rumon Sinha	[redacted]@microsoft.onmicrosoft.com		Guest	No
Momir Radojkovic	[redacted]@microsoft.onmicrosoft.com		Guest	No
Mika Robertson	[redacted]@microsoft.onmicrosoft.com		Member	No

- All users must have an account
- The account is used for authentication and authorization
- Each user account has additional properties

Manage User Accounts

SOTA

+ New user + New guest user ↑ Bulk create ↑ Bulk invite ↑ Bulk delete ↓ Download users ↻ Refresh 🔑 Reset password ↗ Multi-Factor Authentication ...

New user

Microsoft

Create user

new user

Create a new user in your organization.
This user will have a user name like
alice@Microsoft.onmicrosoft.com.

[I want to create users in bulk](#)

Invite user

B2B Guest

Invite a new guest user to collaborate with
your organization. The user will be emailed
an invitation they can accept in order to
begin collaborating.

[I want to invite guest users in bulk](#)

Must be Global
Administrator or User
Administrator to
manage users

User profile
(picture, job, contact
info) is optional

Deleted users
can be restored
for 30 days

Sign in and audit
log information
is available

Create Group Accounts

Add filters

Name		↑↓	Group Type	Membership Type
<input type="checkbox"/>	MA Managers		Security	Assigned ✓
<input type="checkbox"/>	VM Virtual Machine Administrators		Security	Assigned ✓
<input type="checkbox"/>	VN Virtual Network Administrators		Security	Assigned ✓

Group Types

- Security groups
- Microsoft 365 groups

Membership Types

- Assigned
- Dynamic User
- Dynamic Device (Security groups only)

Assign Licenses to Users and Groups

Azure is a cloud service that provides many built-in services for free.

- Microsoft Entra ID comes as a free service
- Gain additional functionality with a P1 or P2 license

Additional Services (like O365 are paid cloud services)

- Microsoft paid cloud services require licenses
- Licenses are assigned to those who need access to the services
- Each user or group requires a separate paid license
- Administrators use management portals and PowerShell cmdlets to manage licenses

- ☐ View license plans and plan details
- ☐ Set the Usage Location parameter
- ☐ Assign licenses to users and groups
- ☐ Change license plans for users and groups
- ☐ Remove a license

Demonstration – Users and Groups

- Review license and domain information
- Explore user accounts
- Explore group accounts

Learning Recap – Configure User and Group Accounts

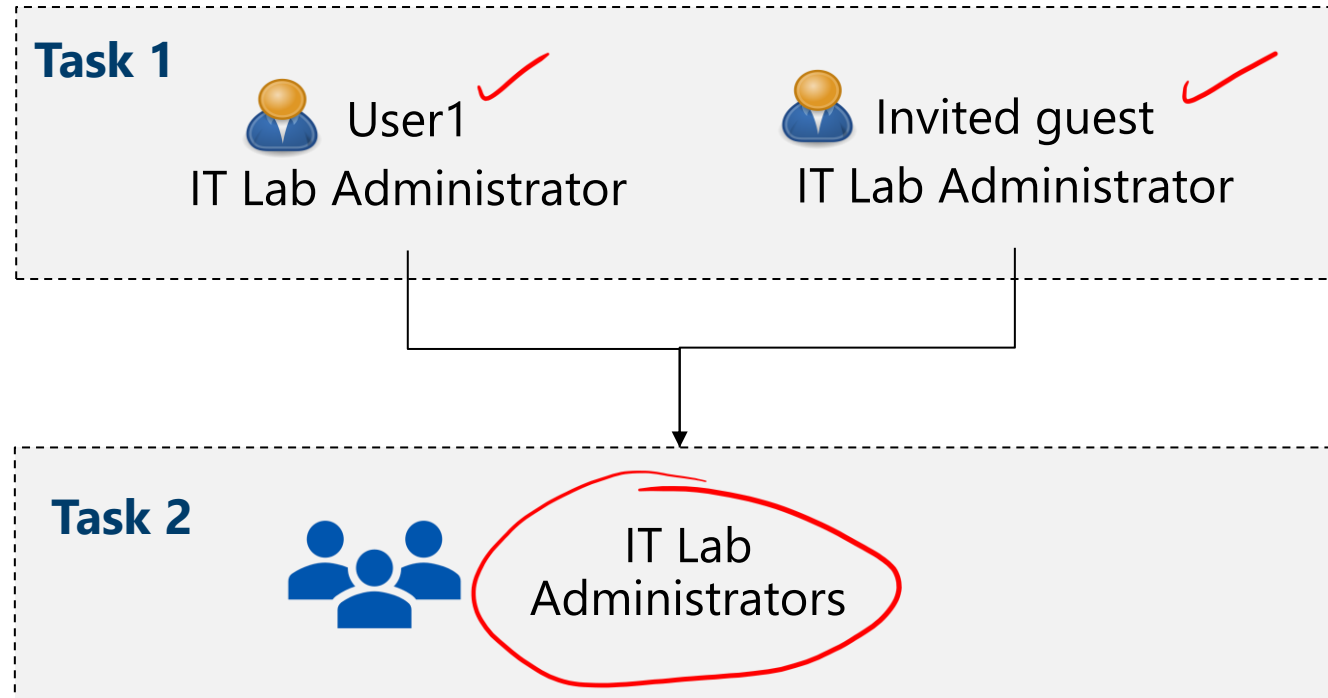

Check your
knowledge
questions and
additional
study

- Create Azure users and groups in Microsoft Entra ID
- Manage users and groups

Lab – Manage Entra ID Identities

Lab 01 – Manage Entra ID Identities (architecture diagram)
