About this course

900 Fundamentals *
AZ - 104 Admin **
305 Design ***

Prerequisites

- Successful Azure Administrators start this role with experience on operating systems, virtualization, cloud infrastructure, storage structures, and networking

Azure Administrator Role

- Cloud Administrators manage the cloud services that span storage, networking and compute cloud capabilities, with a deep understanding of each service across the full IT lifecycle
- They take end-user requests for new cloud applications and make recommendations on services to use for optimal performance and scale, as well as provision, capacity, monitor and adjust as appropriate. This role requires communicating and coordinating with vendors
- Cloud Administrators use the Azure Portal and as they become more proficient, they use PowerShell and the Command Line Interface **ARM**

AZ-104 Course Outline

MS Learn

Learning Path

01: Administer Identity

△ Tenant

07: Administer Azure Storage

Blobs
Files
Disks

02: Administer Governance and Compliance

08: Administer Azure Virtual Machines

03: Administer Azure Resources

04: Administer Virtual Networking

05: Administer Intersite Connectivity

06: Administer Network Traffic Management

09: Administer PaaS Compute Options

10: Administer Data Protection

11: Administer Monitoring

Tools

NIC

Disk

VNet

Peering

VNet 2

VPN
