Administer Governance and Compliance

AZ-104 Course Outline

01: Administer Identity

02: Administer Governance and Compliance ←

03: Administer Azure Resources

04: Administer Virtual Networking

05: Administer Intersite Connectivity

06: Administer Network Traffic Management

07: Administer Azure Storage

08: Administer Azure Virtual Machines

09: Administer PaaS Compute Options

10: Administer Data Protection

11: Administer Monitoring

Learning Objectives

- Configure Subscriptions

- Configure Azure Policy

- Configure Role-Based Access Control

- Lab 02a - Manage Subscriptions and RBAC
- Lab 02b - Manage Governance via Azure Policy

Configure Subscriptions and Configure Azure Resource Manager Resources

# Learning Objectives – Subscriptions and Azure RM

- Identify Regions
- Implement Azure Subscriptions
- Identify Subscription Usage
- Obtain a Subscription
- Create Resource Groups
- Determine Service Limits and Quotas
- Create an Azure Resource Hierarchy
- Apply Resource Tagging
- Manage Costs
- Learning Recap

Manage Azure identities and governance (20–25%): Manage subscriptions and governance

- Configure resource locks
- Apply and manage tags on resources
- Manage resource groups
- Manage subscriptions
- Manage costs by using alerts, budgets, and Azure Advisor recommendations
- Configure management groups

Identify Regions

Region
z.B. westeurope

Avail. Zone Delos
= DZ

① ② ③
A region represents a collection of datacenters

Provides flexibility and scale

Preserves data residency

Select regions close to your users

Be aware of region deployment availability

There are global services that are region independent

Most regions are paired for high availability

Worldwide there are 60+ regions representing 140 countries

Implement Azure Subscriptions

Only identities in Entra ID, or in a directory that is trusted by Entra ID, can create a subscription

Logical unit of Azure services that is linked to an Azure account

Security and billing boundary*

Identify Subscription Usage

Subscription	Usage
Free	Includes a $200 credit for the first 30 days, free limited access for 12 months
Pay-As-You-Go	Charges you monthly
CSP	Agreement with possible discounts through a Microsoft Cloud Solutions Provider Partner – typically for small to medium businesses
Enterprise	One agreement, with discounts for new licenses and Software Assurance – targeted at enterprise-scale organizations
Student	Includes $100 for 12 months – must verify student access

Obtain a Subscription

Enterprise Agreement customers make an upfront monetary commitment and consume services throughout the year

Resellers provide a simple, flexible way to purchase cloud services

Partners can design and implement your Azure cloud solution

**Personal free account** – Start right away

Create Resource Groups
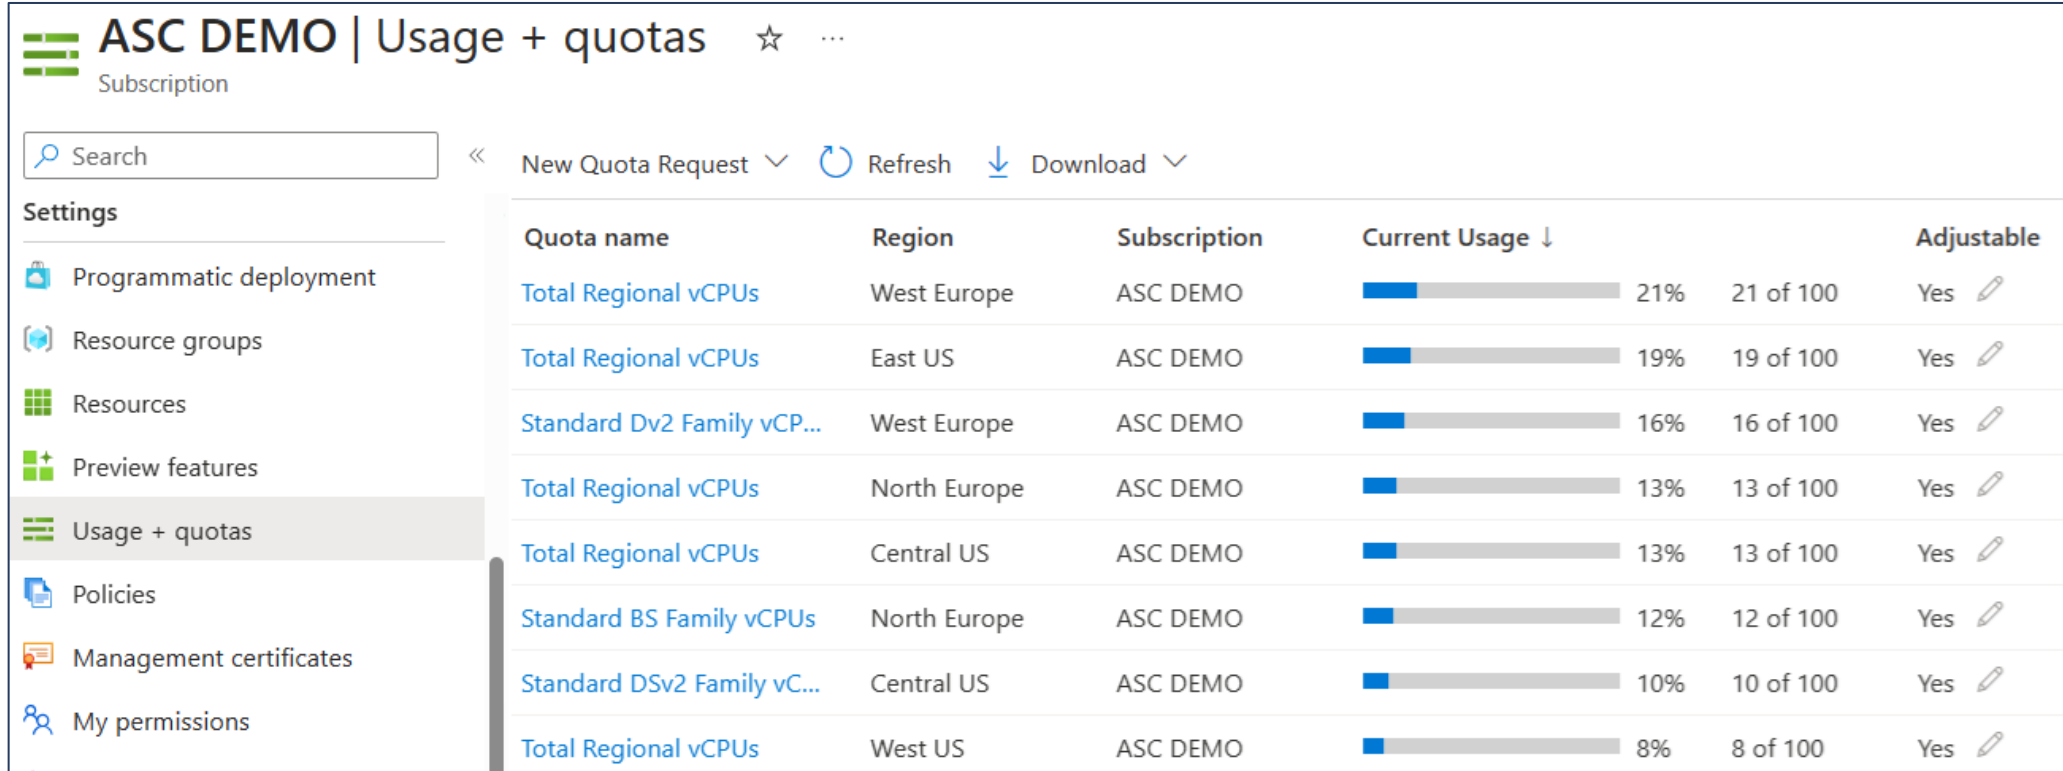

Resources can only exist in one resource group

Groups can have resources of many different types (services) and from many different regions

Groups cannot be renamed or nested

You can move resources between groups

Resources grouped
(Web + DB, VM, Storage) in one group

OR

Web and DB resource group

Virtual machine resource group

Storage resource group

Determine Service Limits and Quotas

ASC DEMO | Usage + quotas ☆ ⋯

📑 Management certificates

👥 My permissions

Quota name	Region	Subscription	Current Usage ↓		Adjustable
Total Regional vCPUs	West Europe	ASC DEMO	21%	21 of 100	Yes ✎
Total Regional vCPUs	East US	ASC DEMO	19%	19 of 100	Yes ✎
Standard Dv2 Family vCP...	West Europe	ASC DEMO	16%	16 of 100	Yes ✎
Total Regional vCPUs	North Europe	ASC DEMO	13%	13 of 100	Yes ✎
Total Regional vCPUs	Central US	ASC DEMO	13%	13 of 100	Yes ✎
Standard BS Family vCPUs	North Europe	ASC DEMO	12%	12 of 100	Yes ✎
Standard DSv2 Family vC...	Central US	ASC DEMO	10%	10 of 100	Yes ✎
Total Regional vCPUs	West US	ASC DEMO	8%	8 of 100	Yes ✎

Resources have a default limit - a subscription quota

Helpful to track current usage, and plan for future use

You can open a free support case to increase limits to published maximums
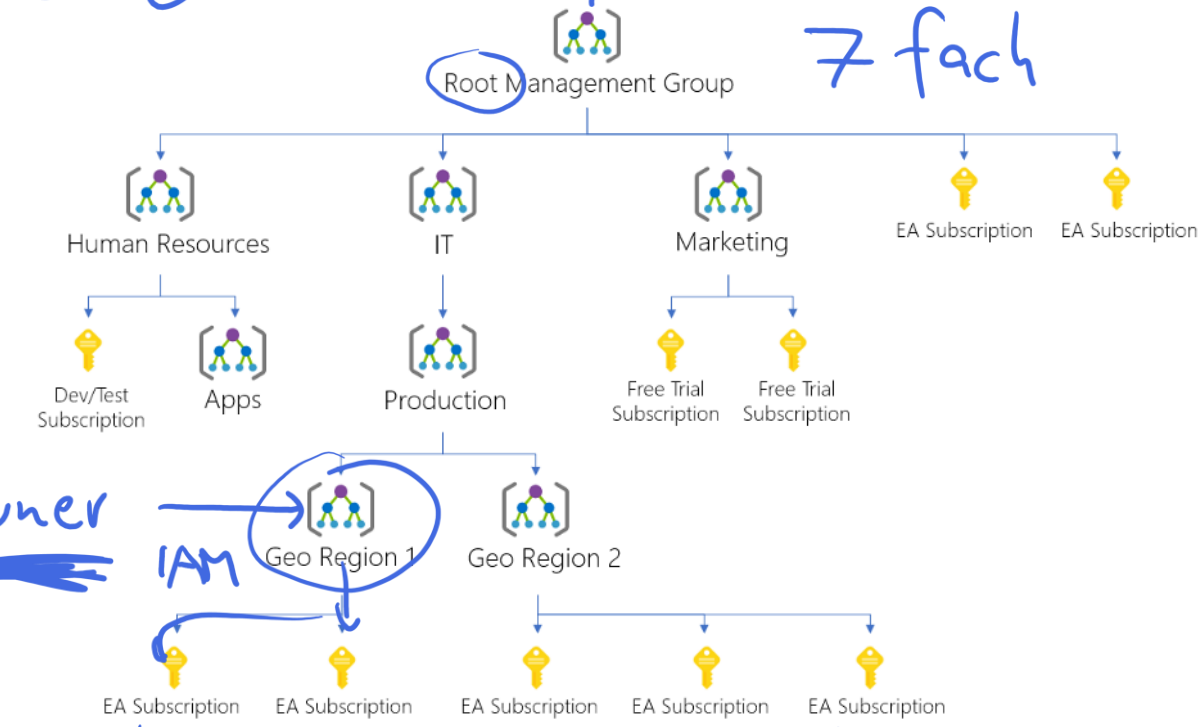

Create an Azure Resource Hierarchy

Management groups provides a level of scope above subscriptions

Target policies and spend budgets across subscriptions and inheritance down the hierarchies

Implement compliance and cost reporting by organization (business/teams)

* To prevent changes, apply resource locks at the subscription, resource group, or resources level

Handwritten annotations: member, Root, Global Admin, Guest, CAF, Landing Zone, Root Management Group, 7 fach, Human Resources, IT, Marketing, EA Subscription, EA Subscription, Dev/Test Subscription, Apps, Production, Free Trial Subscription, Free Trial Subscription, Owner, IAM, Geo Region 1, Geo Region 2, EA Subscription, EA Subscription, EA Subscription, EA Subscription, EA Subscription, RG1, RG2, flat, VM
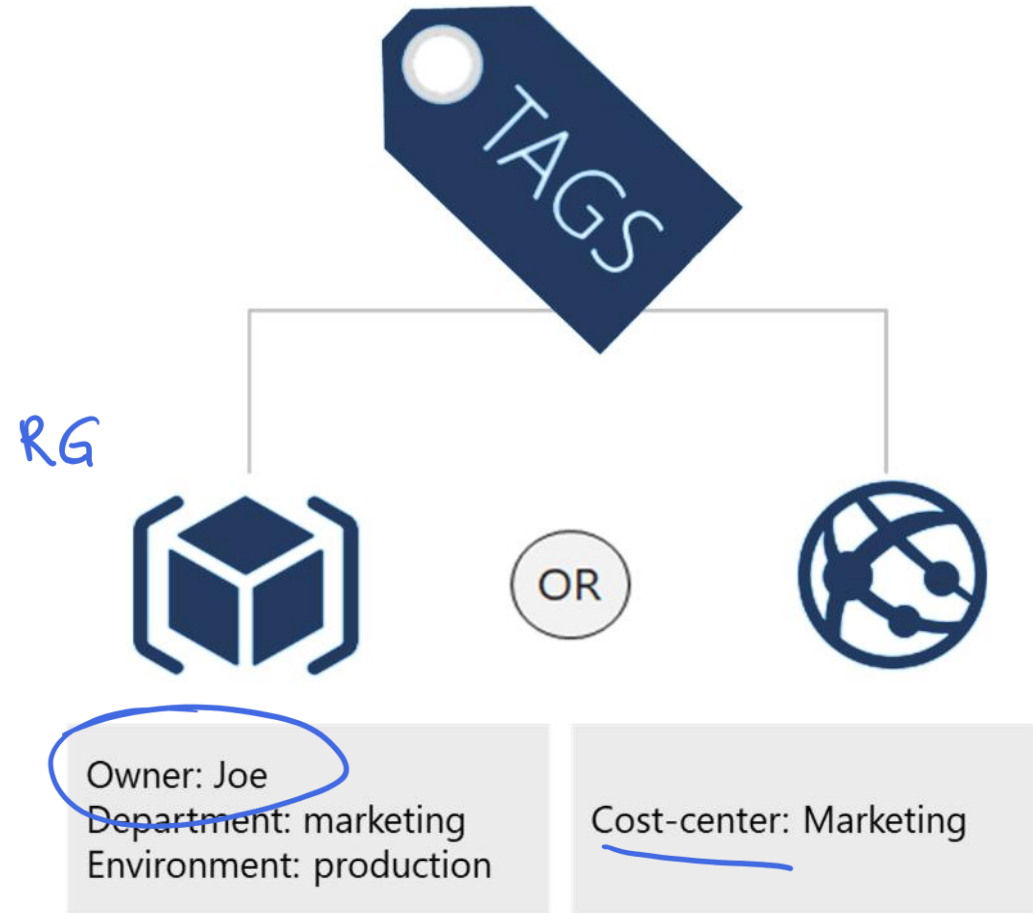

Apply Resource Tagging

Provides metadata for your Azure resources

Logically organizes resources

Consists of a name-value pair

Very useful for rolling up billing information

Department: marketing
Environment: production

Cost-center: Marketing

Manage Costs

- Costs are resource-specific

- Usage costs may vary between locations

- Costs for inbound and outbound data transfers differ

- Pre-pay with Azure reserved instances

- Use your on-premises licenses with Azure Hybrid Benefit

- Optimize with alerts, budgets, and Azure Advisor recommendations

EA Portal
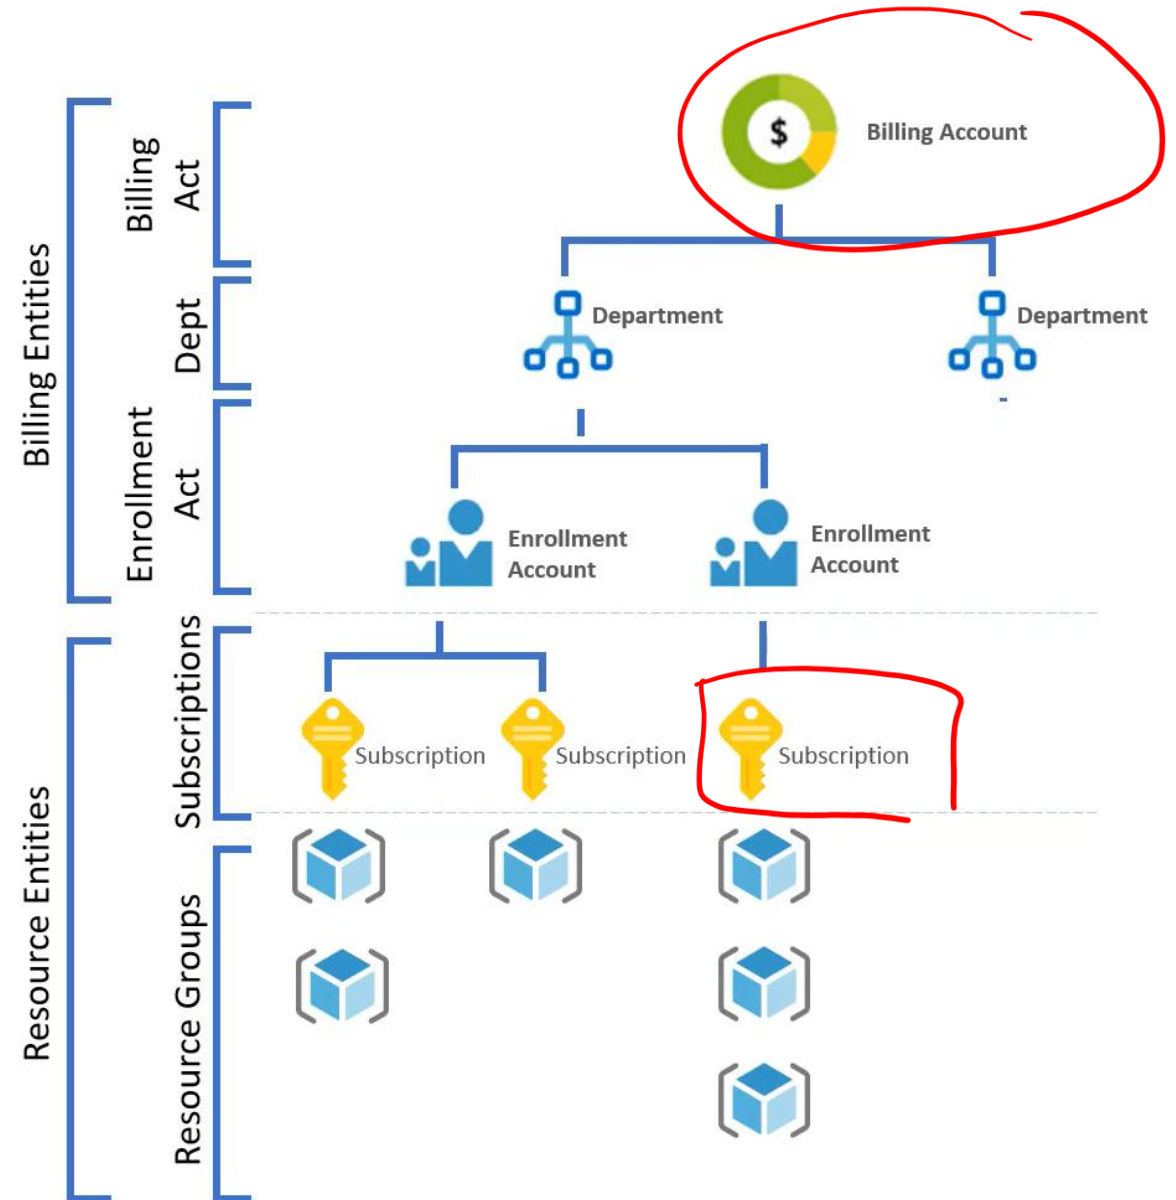

Learning Recap - Configure Subscriptions
Check your knowledge questions and additional study

- Introduction to analyzing costs and creating budgets with Azure Cost Management

- Control and organize Azure resources with Azure Resource Manager

- Use Azure Resource manager

Configure Azure Policy

Implement Azure Policies

Effect — Deny
— Audit
Add

A service to create, assign, and manage policies

Runs evaluations and scans for non-compliant resources

Advantages:
- Enforcement and compliance
- Apply policies at scale
- Remediation

| Usage Cases |
|---|
| **Allowed resource types** – Specify the resource types that your organization can deploy |
| **Allowed virtual machine SKUs** – Specify a set of virtual machine SKUs that your organization can deploy |
| **Allowed locations** – Restrict the locations your organization can specify when deploying resources |
| **Require tag and its value** – Enforces a required tag and its value |
| **Azure Backup should be enabled for Virtual Machines** – Audit if Azure Backup service is enabled for all Virtual machines |

Create Azure Policies

Define and create
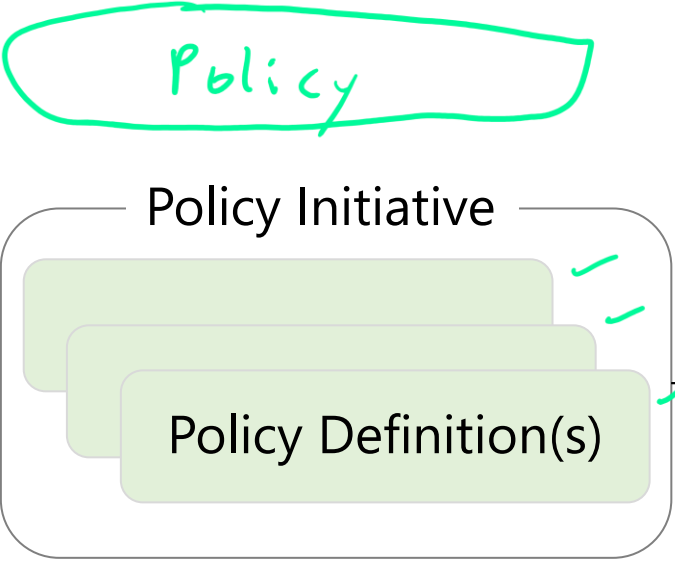

Scope and assign
Assess compliance
Policy

Learning Recap – Configure Azure Policy

Check your knowledge questions and additional study

- Introduction to Azure Policy

Configure Role-Based Access Control (RBAC)

Compare Azure RBAC Roles to Entra ID Roles

RBAC roles provide fine-grained access management

Azure RBAC roles	Entra ID roles
Manage access to Azure resources	Manage access to Entra ID objects
Scope can be specified at multiple levels	Scope is at the tenant level
Role information can be accessed in the Azure portal, Azure CLI, Azure PowerShell, Azure Resource Manager templates, REST API	Role information can be accessed in Azure portal, Microsoft 365 admin portal, Microsoft Graph, Azure Active Directory PowerShell for Graph

✔ **There are many built-in roles, or you can create your own custom role**

Create a Role Definition

Collection of permissions that lists the operations that can be performed

Built-in

Owner
Contributor
Reader
 …
Backup Operator
Security Reader
User Access Administrator
Virtual Machine Contributor

Built-in

Reader Support Tickets
Virtual Machine Operator

Custom

Contributor

```
"Actions": [
 "*"

Learning Recap– Configure RBAC
Check your knowledge questions and additional study

- Create custom roles for Azure resources with Azure role-based access control

- Manage access to an Azure subscription by using Azure role-based access control

- Secure your Azure resources with Azure role-based access control

Lab 02a - Manage Subscriptions and RBAC
Lab 02b - Manage Governance via Azure Policy

Lab 02a – Architecture diagram

Lab 02b – Architecture diagram

Task 1

Resource Group

Name: Cost Center
Value: 000

Task 2

Azure policy
Require a tag and its value on resources

X

New Storage Account without the tag

Task 4

Resource Group

Task 3

Azure policy
Inherit a tag from the resource group if missing – remediation

New Storage Account - policy adds the tag

End of presentation
